[Approximation 9 of Pi by Infinite Series]

We use the approximation formula to find an approximate value of pi.

Android Studio Version 3.5.1

[Outline]

Use the following approximation formula to find an approximate value of pi.

$$pi = \sqrt{2 \, 4 \left(\frac{1}{2^2} + \frac{1}{4^2} + \frac{1}{6^2} + \frac{1}{8^2} + \cdots \right)}$$

Let's observe how the approximate value of pi can be obtained as the number of terms increases.
